SUBJECT INDEX

acetylcholine metabolism - in diencephalic conduction system, 583
acetylcholine synthesis - and choline efflux, 219
acetylcholine synthesis - in synaptosomes, 219
acetylcholine - decarboxylation, 201
acetylcholine - release from the retina, 43
adenosine A_1 receptors - interaction with amiloride, 207
ω-Agatoxins - effect on calcium channels in different preparations, 263
aging of human brain - effect of gangliosides, 421
aluminium - influence brain gangliosides, 391
Alzheimer's disease - distribution of gangliosides, 433
amiloride - effect on adenosine A_1 receptors, 207
antibodies - to antigangliosides, 353
antiganglioside antibodies - in motor-neuron disease, 353
antiganglioside antibodies - in peripheral neuropathies, 353
astrocyte membranes - interaction with sialosyl cholesterol, 493
astrocytes - binding of sialosyl cholesterol, 493
astrocytes - synthesis and release of GABA, 567
autoradiography - incorporation of valine into proteins, 537

benzodiazepine receptor sites - modulated by light, 257
benzodiazepine receptors - postnatal development, 257
brain stem - levels of β-endorphin and neurotensin, 97
α-bungarotoxin binding - role of histidine residues, 521
α-bungarotoxin binding - to nocotinic receptors, 521
butyrylcholine - decarboxylation, 201

caecum mucosa - release of substance P-immunoreactivity, 529
calcium channels - effect of ω-Agatoxins, 263
calcium - effect on binding of presynaptic membranes and vesicles, 55
calcium - ganglioside interactions, 323
calcium - in synaptic plasticity, 323
calcium - intrasynaptosomal levels, 275
calcium-dependent - release of acetylcholine and GABA, 43
cAMP - and dopamine functions in the retina, 168
catecholamine production - in adrenal chromaffin cells, 229
catecholamine production - related to tyrosine supply, 229
catecholamine secretion - in chromaffin cells, 501
Ca^{++}/calmodulin-dependent protein kinase II, 61
cerebral cortical neurones - synthesis and release of GABA, 567
cerebral spinal fluid - in Sudden Infant Death Syndrome, 97
3-chloro-α-phenylpyrazinemethanol - inhibits monoamine oxidase, 37
choline efflux - related to acetylcholine synthesis, 219
choline esters - and decarboxylation, 201
choline esters - on dimethylcarbamyl-acetylcholinesterase, 201
choline uptake - effect of monosialoganglioside GM1, 289
cholinergic neurones - in diencephalic system, 583
cholinergic neurotoxins - ethyl-choline and hemicholinium-3, 289
chromaffin cells - catecholamine formation, 229
chromaffin cells - catecholamine secretion, 501
chromaffin cells - effects of inorganic thiophosphate, 501
chromaffin cells - thiophosphorylated proteins, 511
chromaffin vesicle matrix, 511
Conus distans toxin - inhibits neurotransmitter release, 69
convulsant - action of 3-mercaptopropionic acid, 591
corticotropin releasing factor - increases tryptophan hydroxylase activity, 81
co-culture of neurones and astrocytes - GABA release and synthesis, 567
co-localisation - of dopamine and GABA, 147
co-release - of acetylcholine and GABA, 43
cytoskeletal proteins - effect of tri-o-cresyl phosphate on protein phosphorylation, 247
c-fos mRNA - effect of MPTP treatment, 281

decarboxylation - effect of choline esters, 201
decarboxylation - of acetylcholine and butyrylcholine, 201
Dendroaspis angusticeps venum - contains polypeptides that act on muscarinic receptor sites, 237
Dendroaspis angusticeps - characterisation of K^+ channel blockers, 553
development of human brain - influence of gangliosides, 421
development - of vagal motor neurones, 119
diabetes - insulin receptor kinase activity, 487
diencephalic conduction system - acetylcholine metabolism, 583
differentiation - and gangliosides, 339
24R,25-dihydroxyvitamine D_3 - prevents aluminium-induced alteration of brain gangliosides, 391
dimethylcarbamyl-acetylcholinesterase - influence of choline esters, 201
di-methyl proline releasing hormone - stimulates phosphoinositide turnover, 307
dopamine functions - in the retina, 179
dopamine functions - related to cAMP, 168
dopamine neurones - in different retinas, 141
dopamine receptors - in human foetal brain, 559
dopamine receptors - ontogeny, 559
dopamine release, 147
dopamine transport - effect by hypoxia, 385
dopamine transport - effect of gangliosides, 385
dopamine - co-localises with GABA, 147
dopamine - different methods for localisation, 140
dopamine - in the retina, 139
dopamine - modulator in the retina, 193

β-endorphin - in cerebral spinal fluid, 97
β-endorphin - level in infant human brain, 93
enterochromaffin cells - release of substance P-immunoreactivity, 529
enzyme immunoassay - of nerve growth factor, 215
Escherichia coli - used to produce nerve growth factor, 129
ethyl-choline - cholinergic neurotoxin, 289

fatty acids - effect on Na^+/K^+-ATPase, 12

GABA - colocalises with dopamine, 147
GABA - release from retina, 43
GABA - synthesis and release, 567
GABAergic mechanisms - of neurones co-cultured with astrocytes, 567
ganglioside GM1 inner ester - GM1 lactone, 359
ganglioside - calcium interactions, 323
ganglioside - dependent factor, 401
ganglioside -of brain and vascular plexus, 365
gangliosides - and hypoxia, 385
gangliosides - distribution in Alzheimer's disease, 433
gangliosides - effect of aluminium, 391
gangliosides - effect on neuronal survival, shape and growth, 409
gangliosides - in development and aging, 421
gangliosides - in human brain, 421
gangliosides - in meningoencephalitis, 365
gangliosides - in neuronal differentiation, 339
gangliosides - in synaptic plasticity, 323
gangliosides - influence on action of sialosyl cholesterol, 493
gangliosides - influence on dopamine uptake, 385
gangliosides - involvement in regeneration of optic nerve, 371
gangliosides - protein interactions in granule cells, 315
glycine receptors - in retina, 473
glycine receptors - modulation in NMDA toxicity, 473
glycine receptors - strychnine-insensitive, 473
GM1 ganglioside - containing photoactivable azide, 315
GM1 lactone - prodrug of GM1, 359
granule cells - proteins interact with gangliosides, 315

hemicholinium-3 - cholinergic neurotoxin, 289
hippocampus - synaptic plasticity, 441
histidine residues - in α-bungarotoxin binding site, 521
homocysteate - effects on amino acids, 75
homocysteine - effects on amino acids in hippocampus, 75
hypoxia - beneficial effect of gangliosides, 385
hypoxia - effect on dopamine uptake, 385

insulin receptor kinase activity - in diabetes, 487
insulin receptors - in rat brain, 487
insulin - stimulation of kinase activity, 487

lipid peroxidation - in synaptosomes, 401
lipid peroxidation - reduced by ganglioside-dependent factor, 401
long-term potentaition - involvement of opioids, 441
long-term potentiation - and endogenous opioids, 457
long-term potentiation - and opioid peptides, 469
long-term potentiation - independence of NMDA receptors, 461

maturation of newborn rat brain - implications for Sudden Infant Death Syndrome, 109
medulla oblongata of Sudden Infant Death children - binding of neurotensin and somatostatin, 113
melatonin - biosynthesis in the retina, 23
melatonin - formation in photoreceptors, 25
melatonin - in the retina, 179
melatonin - regulation in the retina, 23
memory - involvement of opioid peptides, 449
meningoencephalitis - gangliosides in brain and vascular plexus, 365
3-mercaptopropionic acid - a convulsant, 591
3-mercaptopropionic acid - increases binding of quinuclidinyl benzilate binding, 591
microdialysis - of amono acids, 75
modulation - of acetylcholine metabolism, 583
modulation - of benzodiazepine receptors by light, 257
modulator - of dopamine in the retina, 193
monoamine oxidase - inhibited by 3-chloro-α-phenylpyrazinemethanol, 37
monosialoganglioside GM1 - effect on choline uptake, 289
motor-neuron disease - presence of antiganglioside, 353
MPTP - induction of c-fos mRNA, 281
MPTP = 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine, 281
mRNA of N-methyl-D-aspartate receptors - injected into Xenopus oocytes, 299
mucosa - release of substance P-immunoreactivity, 529
muscarinic receptor ligands - inhibition by polypeptides from snake, 237

Na^+/K^+-APTase - effect of stimulatory ligands, 13
Na^+/K^+-ATPase, 1
Na^+/K^+-ATPase - and synaptic transmission, 19
Na^+/K^+-ATPase - effect of ouabain-like compounds, 11
Na^+/K^+-ATPase - regulation by neurotransmitters, 1
nerve growth factor - analysis by enzyme immunoassay, 215
nerve growth factor - expression in Escherichia coli, 129
neuronal calcium channels - blocked by ω-Agatoxin, 263
neuronal growth - effect of gangliosides, 409
neuronal shape - effect of gangliosides, 409
neuronal survival - effect of gangliosides, 409
neurotensin - binding to medulla oblongata, 113
neurotensin - in brain stem, 97
neurotensin - in cerebral spinal fluid, 97
neurotransmitter release - inhibition of toxin from Conus distans, 69
neurotransmitters - influence of Na^+/K^+-ATPase, 1
nicotinic acetylcholine receptors, 521
noradrenaline-organelles - from sympathetic ganglia, 577
N-methyl-D-aspartate receptors - expressed in Xenopus oocyte, 299

NMDA neurotoxicity - in retina, 473
NMDA neurotoxicity - involvement of glycine, 473
NMDA receptors - and opioids, 447
NMDA receptors - independence in long-term potentiation, 461

ontogeny - of dopamine receptors in human brain, 559
ontogeny - of vagus nerve, 119
opioid action - role of second messengers, 465
opioid pathways - involvement of NMDA receptors, 447
opioid peptides - and long-term potentiation, 441, 457, 469
opioid peptides - control of breathing, 103
opioid peptides - seizures and memory, 449
opioid receptor - peptidergic regulation, 441
opioid transmission - dysregulation in Sudden Infant Death Syndrome, 103
opioids - exctatory effects, 463
opioids - in hippocampus, 441
optic nerve - regeneration, 371
ouabain - effect on Na^+/K^+-ATPase, 11

P_{400} protein - phosphorylation in synaptic cytoskeleton, 61
P_{400} protein - substrate for Ca^{++}/calmodulin-dependent protein kinase, 61
peripheral neuropathies - antiganglioside antibodies, 353
phorbol esters - binding of presynaptic membranes and vesicles, 55
phosphoinositide turnover - in astrocytes, 307
phosphoinositide turnover - stimulated by thyrotropin releasing hormone, 307
phosphorylation of cytoskeletal proteins - in sciatic nerve, 247
phosphorylation - increases with tri-o-cresyl phosphate treatment, 247
photoreceptor - site for melatonin formation, 25
photoreceptors - retinomotor movements, 156
postsynaptic density-enriched fractions - from different brain regions, 61
potassium channel blockers - purification, 553
potassium channel blocking peptides, 553
presynaptic membranes - binding to synaptic vesicles, 55

quantitative autoradiography, 537
quinuclidinyl benzilate binding - increased by 3-mercaptopropionic acid, 591
quinuclidinyl benzilate binding - to cholinergic receptor, 591

receptor - nicotinic type, 521
recombinant human nerve growth factor, 129
regeneration of optic nerve - involvement of gangliosides, 371
release - of dopamine, 147
retina - dopaminergic system, 139
retina - glycine receptors, 473
retina - melatonin cycle, 179
retina - NMDA-induced neurotoxicity, 473
retina - release of acetylcholine and GABA, 43
RU 38486 - blocks effect of corticotropin releasing factor, 81

sodium/potassium ATPase, see Na^+/K^+-ATPase synaptosomes - lipid peroxidation, 401
second-messengers - role of opioid action, 465
seizures - involvement of opioid peptides, 449
serotonin - inhibits substance P-immunoreactivity release, 529
sialosyl cholesterol - binding to astrocyte membranes, 493
sialosyl cholesterol - interaction with gangliosides, 493
sialosyl cholesterol - interactions with plasma membrane astrocytes, 493
snake venum polypeptides - act on muscarinic cholinergic sites, 237
snake venum - purification of K^+ channel blockers, 553
somatostatin - binding sites to medulla oblongata, 113
spider venum toxins - ω-Agatoxins block neuronal calcium channels, 263
spiperone - binding in human brain, 559
striatum - spiperone binding in human brain, 559
strychnine-insensitive - glycine receptors, 473
substance P-immunoreactivity - release from enterochromaffin cells, 529

substance P-immunoreactivity - release inhibited by serotonin and calcium free medium, 529
Sudden Infant Death Syndrome - dysregulation of opioid transmission in breathing, 103
Sudden Infant Death Syndrome - levels of neurotensin and β- endorphin cerebral spinal fluid and brain stem, 97
Sudden Infant Death Syndrome - maturation of the brain, 109
Sudden Infant Death Syndrome -β-endorphin in brain, 93
sympathetic ganglia - preparation of noradrenaline-storing organelles, 577
synaptic connectivity in the retina, 153
synaptic cytoskeleton - phosphorylation of P_{400} protein, 61
synaptic plasticity - in hippocampus, 441
synaptic plasticity - role of gangliosides and calcium, 323
synaptic vesicles - binding to presynaptic vesicles, 55
synaptosomal levels - of calcium, 275
synaptosomes - acetylcholine synthesis, 219
synaptosomes - effect of ω-Agatoxins on calcium channels, 263

thiophosphorylated proteins - in chromaffin cells, 511
thyrotropin releasing hormone - stimulates phosphoinositide turnover, 307
toxin - from snail inhibits neurotransmitter release, 69
tri-o-cresyl phosphate - increases phosphorylation of cytoskeletal proteins,247
tryptophan hydoxylase - activity increased by corticotropin releasing factor 81
tryptophan hydroxylase activity - in amygdala, 81
tumor proteins - incorporation of valine, 537
tyrosine - supply related to catecholamine production, 229

vagal motor neurones - development, 119
vagus nerve - ontogeny, 119
valine - incorporation into tumor proteins, 537
vanadium - effect on Na^+/K^+-ATPase, 12
vesicles - noradrenaline-containing, 577
vesicles - of chromaffin cells, 511
Xenopus oocyte - expression of N-methyl-D-aspartate receptors, 289
